Curtains

WIDTH

- Measure the track or pole, not the window.
- For tracks: Measure the width from end to end. If the track overlaps in the middle, measure each track and combine the dimensions for an overall width.
- For poles: measure between the finials.

LENGTH

Measure from:

- For tracks: measure from the top of the track so that it will be hidden by the curtains.
- For poles: measure from the bottom of the curtain ring so that the pole will be seen above the curtains. For eyelet curtains, measure from the top of the pole and add 4cm (1.5 inches).

Measure to:

- For tracks and poles: measure to 1cm (0.5 inches) above the sill for sill length; to the required length for below-sill length; and 1cm (0.5 inches) above the floor for floor length (see diagram).

Tie Back Styles (if required)

Crescent Tie Back

Piped Tie Back

Pelmets

WIDTH

- To find out the total width of the pelmet, measure the distance from the wall to the front of the pelmet track (a). double it and add it to the width of the pelmet track (b).

DROP

- The ideal drop for a straight pelmet is one sixth of the overall length of the curtains but can be anything you choose between 25cm (10inches) and 36cm (14inches).

INSIDE A WINDOW RECESS

Make sure that the recess is not obstructed in any way and is at least 7.5cm (3inches) deep to accommodate the operating mechanism.

- Measure the drop from the top to the bottom of the recess (a-b)
- Measure the width of the recess (c-d). and check above and below this line to give the narrowest measurement.
- For Roman blinds only, reduce the width measurement by 1.5cm (0.5inches) to allow the blind to fit in the recess.

OUTSIDE A WINDOW RECESS (ROMAN BLINDS ONLY)

Decide how far you want the blind to overlap the recess. This is generally a minimum of 5cm (2inches) of all sides.

- Measure the drop from the top to the bottom of the window plus the overlap (e-f)
- Measure the width plus the overlap (g-h)

PULL CORD OPTIONS AVAILABLE

- Cord (Plastic) for Rollers and Verticals
- Wands (Plastic) available for Verticals

BLIND COLOUR OPTIONS (ROLLER / VERTICAL)

- We use Palette as standard for Rollers and Verticals - 53 colours available
- Black out fabric Banlight (limited colours) - 12 colours available
- Wood effect venetian Blinds FR (Plastic) - 7 Colours available
