

Safety First

WITH BARONS' HIGH-PERFORMANCE FIRE-RETARDANT FABRICS

Fabrics used in commercial settings, including Care Homes, Senior Living, and Assisted Living environments, are **legally required** to meet the British Standard for Flame retardancy.

All healthcare accommodation providers need to be aware that not all fabric suppliers follow the same guidelines when it comes to fire safety. Whether it is upholstered furniture, soft furnishings, or curtains, it is the owner and their management's responsibility to ensure all fabrics in their facilities meet the relevant British Standard regulations.

Safeguard Your Staff, Residents & Visitors

To safeguard your staff, residents, and visitors, Barons partners only with reputable fabric suppliers and manufacturers, selecting quality fabrics that have undergone rigorous testing to ensure they are fire retardant. Unlike some domestic products available to the general public, our fabrics are fully compliant with all relevant British Standards for flame retardancy regulations.

It's important to stay compliant with legislation and only buy from a contract furniture manufacturer and soft furnishings suppliers that follow Crib 5 legislation to keep you and your residents safe.

All upholstered furniture, soft furnishings, and curtains supplied by Barons will meet the required FR standard for your property.

It's Not an Option, It's the Law

The British Standard for flame retardancy is legislated to ensure optimum safety within commercial settings. Ultimately, compliance will help keep you, your residents, and employees safe. Non-compliance, on the other hand, can lead to prosecution and even lawsuits by individuals seeking compensation for injuries or loss of life.

Why Will You Stay Safe with Barons?

At Barons, we take fire safety very seriously. That's why all our upholstery fabrics and soft furnishings are fire retardant and fully compliant with current fire safety regulations. Offering peace of mind and ensuring your furniture and interiors not only look fantastic but are also as safe as possible.

Inherently flame retardant, our selected fabric ranges are treated to meet the British standards. This means that under test conditions, they neither catch alight too swiftly nor shed any flaming debris.

All upholstered furniture, soft furnishings, and curtains supplied by Barons will meet the required FR standard for your property.
